

WEATHER FORECAST APP

PROJECT DOCUMENTATION

Intern Details

Candidate Name: Kummetha Mounika

Selected For: Frontend Web Development

Organization: Codtech IT Solutions Private Limited

Duration: 6 Weeks

Internship Period: 06 June 2026 - 18 July 2026

Intern ID: CITS2257

Project Name: Weather Forecast App

1. Introduction

The Weather Forecast App is a frontend web application developed using HTML, CSS, and JavaScript. The application is designed to display weather information through a clean, responsive, and user-friendly interface. It demonstrates the basic concepts of frontend web development and JavaScript functionality.

2. Objectives

- Design a responsive weather application.
 - Improve HTML, CSS, and JavaScript skills.
 - Create an attractive user interface.
 - Build a simple and easy-to-use web application.
 - Practice frontend development concepts.
-

3. Technologies Used

- HTML5
- CSS3
- JavaScript

- Notepad
-

4. System Requirements

Hardware

- Intel Core i3 Processor or above
- 4 GB RAM
- 100 MB Free Disk Space

Software

- Windows 10/11
 - Any modern web browser
 - Notepad
-

5. Project Modules

Home Page

- Displays the application title.
- Provides navigation and weather display section.

Weather Display

- Shows weather-related information.
- Organizes data in a clean layout.

Responsive Design

- Adjusts automatically for desktop and mobile devices.
-

6. Working Procedure

1. Open the project folder.
2. Open **index.html** in a web browser.
3. The application loads the weather interface.
4. Weather information is displayed through the webpage layout.
5. Users can interact with the interface as designed.

7. Advantages

- Simple and easy to understand.
- Attractive user interface.
- Responsive design.
- Beginner-friendly project.
- Lightweight application.
- Easy to maintain.

8. Limitations

- Does not retrieve live weather information.
- Does not use an online weather service.
- Displays only the weather information included in the project.

9. Project Scope

The project can be enhanced by adding:

- Live weather updates
- Search by city name
- GPS-based weather
- 7-day forecast
- Weather icons
- Dark mode
- Animated weather effects
- Multiple language support

10. Testing

Functional Testing

- Pages open correctly.

- Navigation works properly.
- Responsive layout functions correctly.
- JavaScript interactions work as expected.

User Interface Testing

- Buttons work correctly.
 - Layout is responsive.
 - Design displays properly on different screen sizes.
-

11. Result

The Weather Forecast App successfully demonstrates frontend web development concepts using HTML, CSS, and JavaScript. The application provides a clean, responsive interface and serves as a good beginner-level web development project.

12. Conclusion

The Weather Forecast App is a simple and effective frontend web development project developed using HTML, CSS, and JavaScript. It showcases responsive design, user interface development, and JavaScript functionality while providing a strong foundation for future enhancements such as live weather integration.
